

Piercing screw

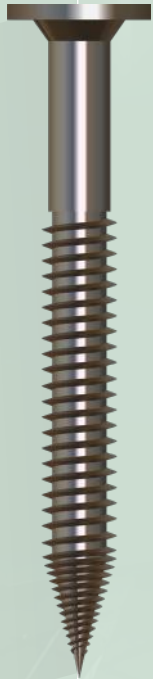

- Suitable for mounting on carrier panels.

The o825 SN 5,5 x 45, TX 20 - has been specially developed for fitting wooden battens to steel sandwich carrier panels. The sharp point screws through the wood and the outer plate of the sandwich panel in one go. The countersunk head with widened flange is easily drawn into the wood. The screw is made of stainless steel type 410 - EN 10088-3: 2005 and provided with an organic protective coating.

Ipex Fasteners

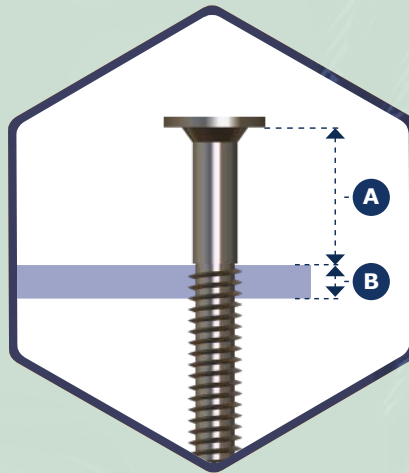

Self-tapping screw, for mounting wooden battens on outer shell of steel sandwich panels.
