

Wood screws

Suitable for wooden facade cladding

Wooden cladding provides a special and natural appearance. Because of this, its use is becoming more and more popular.

IPEX has a wide range of wood screws which are very suitable for wooden facade cladding.

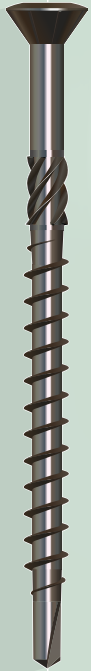

- **0741** - Wood screw with small drill point
- **0742** - Wood screw with notch point

| Powder coating is possible with these screws in all colours. |

The IPEX logo is a circular emblem with a grid pattern. The word "IPEX" is written in a bold, blue, sans-serif font across the center of the grid.

Ipex Fasteners

The wood screw with a small drill point is ideal for wooden cladding. With its effective design, this screw provides easy and sturdy fastening, while the small drill point preserves the wood. An essential choice for a sustainable and aesthetic finish to your facade.

Wood screw with small drill point
