

Ipex Profiles

The aluminium Z-profile and Omega-profile are ideal for fixing facades. Cut to size and, if required, fitted with ventilation holes, these profiles offer a versatile solution. With their durable properties, they contribute to an efficient and well-ventilated façade construction.

Omega profile

Aluminium

0705

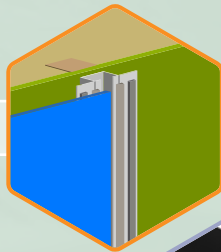

Material:
- EN AW 6063 T66

Surface:
- Brute
- Black anodised

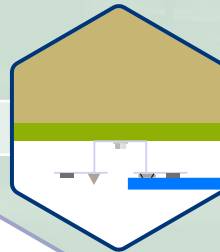

A (MM)	B (MM)	C (MM)	LENGTH (MM)
40	25	1,10	3000

Production:
- Profile cutting to size.
- Profiles can be provided with hole patterns.
