Piercing screw

Suitable for mounting on thin profiles.

The o681 self piercing screw with hexagonal head is the perfect choice for mounting on thin profiles. The sharp point of this screw effortlessly drills through the material, resulting in quick and easy installation. In addition, this screw offers the option of adding a sealing washer of your choice, making it suitable for applications where sealing is essential. Choose efficient and reliable installation with our self piercing screw.

o681 - Self piercing screw with very sharp tip.

In 2022, ETA certification started on the o681 for the 4.8 and 6.0 diameter, for both steel and aluminium fasteners.

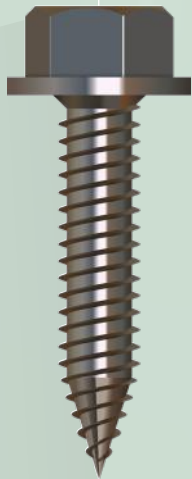

| Powder coating is possible with these screws in all colours. |
